Dear Admissions Officer,

I am writing to highly recommend Mr. Humbat Jamalov for your Master's program. Since the second semester of 2021, I have been an Invited Professor at the French-Azerbaijani University (UFAZ) in Baku, Azerbaijan, where I teach courses in the BSc of Computer Science undergraduate program. During this time, I had the pleasure of instructing Humbat in Software Engineering (2025).

Over the past two years, Humbat has consistently demonstrated exceptional academic performance and a deep understanding of complex computer science concepts. In 2024, he achieved an impressive GPA of 98%, placing him among the top students in his class. His analytical skills, attention to detail, and ability to grasp advanced topics quickly set him apart from his peers.

Humbat is not only academically gifted but also highly motivated and diligent. He actively participates in class discussions, consistently meets deadlines, and shows a genuine passion for learning. His problem-solving abilities and innovative thinking have been evident in his coursework and projects. He also exhibits strong leadership qualities and collaborates effectively in team settings.

I am confident that Humbat will make significant contributions to your institution, both academically and within the campus community. His dedication, intellectual curiosity, and enthusiasm for computer science make him an outstanding candidate for your Master's program. I wholeheartedly endorse his application.

Please feel free to contact me if you require any further information.

Sincerely,

Prof. Igor S. Peretta, PhD  
Computer Engineering Coordinator  
Faculty of Electrical Engineering (FEELT)  
Federal University of Uberlândia (UFU)
